### **SOCIALISATION ADVICE**

All puppies are born in to a family life style, they are familiar with both people and other family pets.

We start as we mean to go on, all puppies are handled regularly and gently and monitored on an hourly basis and feeding is supervised in batches ensuring each and every puppy is suckling until much stronger.

As the puppies develop over the weeks we introduce play items and noises which contributes to the  
Early development of the puppies.

This early groundwork is critical and provides your chosen puppy good social and emotional wellbeing and has a direct impact on the function of being fit for a family pet.

All of the puppies we breed are placed in good family homes and regular checks and updates will be carried out appropriately.

If you have any issues or concerns with your puppy we welcome your feedback and in extreme cases of unsuitability a full refund will be made and we will gladly have the puppy back.
